### Codes-Hard Mode

When you first boot the game, and the white "Sony" screen appears, hold (Down + Square + L1 + R2) and keep them down throughout the booting process. When you start the game, the word HARD will appear, blinking on the bottom of the screen. The game is ridiculously difficult in this mode.

### Play As Baiken

Finish the game with Sol Badguy or Ky Kiske without using a continue. After the credit sequence, you will get a chance to fight Baiken. Defeat her and you can play as her in the vs mode.

### Play As Justice and Testament

Finish the game with any character using any amount of continues to play as Justice and Testament in the vs mode.

### Basic Strategies

Don't get pinned in the corner of the screen. That is the worst spot to have your character in. If possible, try to drive the computer controller character into the corner and attack him with combos and chain hits. Repeat if necessary.

If the computer is attempting to perform a finishing move on you, quickly reverse the instant kill to evade. Once you have done so, try to turn the tables and perform an instant kill on the computer.
